

How Total Health Index™ improves business outcomes

The revolutionary Total Health Index (THI) is a suite of evidence-based analytical tools that help improve health, engagement and productivity. The clear and actionable insights you and your employees receive can be used by both of you to make decisions that have the greatest impact on total health, leading to increased organizational effectiveness and better business performance. THI supports return on investment (ROI) and value of investment (VOI) analysis that demonstrates which programs are having an impact and to what degree.

Business Challenges

Chronic health issues result in reduced employee health, engagement and productivity

Decisions on how best to direct limited resources are often based on incomplete information and lack of evidence

THI solves these business challenges and enables employers to:

THI solutions tie human capital metrics to business outcomes.
