

Introducing AbilitiCBT

In these challenging times, you may be looking for ways to support people as they struggle with mental health issues.

AbilitiCBT can help with a suite of programs designed to provide help when people need it, where they need it.

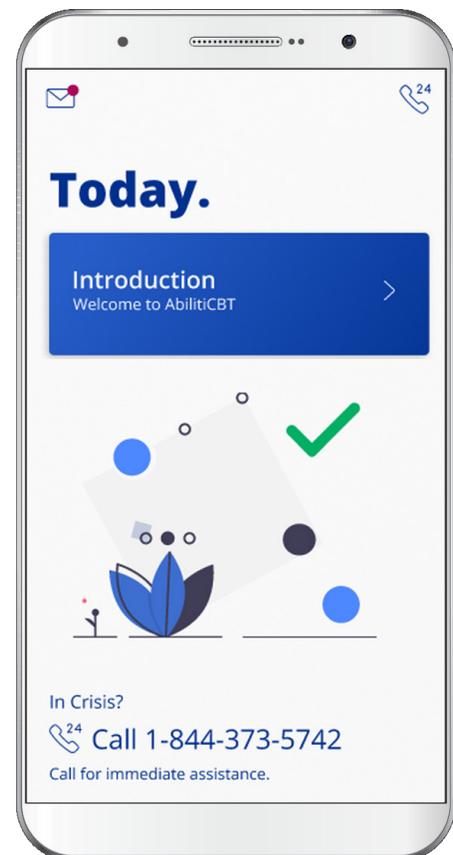

AbilitiCBT is internet-based cognitive behavioral therapy (iCBT) guided by a professional therapist through a digital platform accessible anywhere.

AbilitiCBT combines the convenience of virtual access with the same benefits of in-person therapy to provide meaningful mental health support to people struggling with a variety of conditions, such as **anxiety, depression, grief and loss, trauma** and many others.

AbilitiCBT also includes a program specifically designed to address **anxiety symptoms related to the COVID-19 pandemic**, with content tailored to its uniquely challenging aspects: uncertainty, isolation, caring for family and community members, information overload and stress management.

AbilitiCBT

Why choose AbilitiCBT?

It works.

- AbilitiCBT is clinically effective. It starts with a needs assessment through an online questionnaire and consultation with a professional therapist — either by phone or video.
- Individuals move through structured modules, at their own pace, while the therapist actively tracks and monitors progress. There are scheduled check-ins along the way by phone, video or messaging.

It's convenient.

- AbilitiCBT is a convenient way to provide support to people from the comfort and privacy of their home.
- AbilitiCBT is accessed through the AbilitiCBT app, using a smartphone or tablet or on a computer using the web version. It complies with Web Content Accessibility Guideline (WCAG) 2.0.

It's supported by experts.

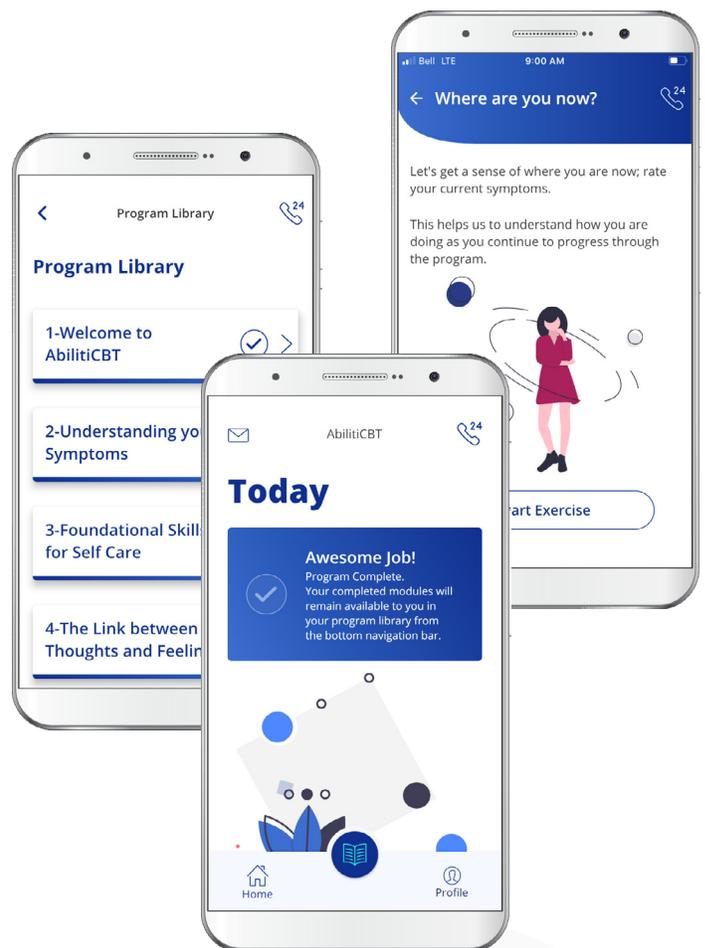

- AbilitiCBT therapists are regulated health professionals or members of a professional college/association.
- All AbilitiCBT therapists:
 - Are registered social workers or psychotherapists
 - Have successfully completed an intensive screening process with reference checks
 - Are well-versed and experienced CBT practitioners
 - Receive specialized inclusion and diversity training focused on mental health services
- Users have access to a dedicated 24/7/365 crisis line overseen by master level clinicians.

It's confidential.

- Morneau Shepell handles all requests and progress tracking.
- Personal information is never shared.

It's a great complement to other resources.

With its clinically effective combination of structured digital modules and ongoing therapist guidance, AbilitiCBT can serve as a complementary resource to provide more complex and extended support.
